Immunotherapy at Jangdeuk Korean Medicine Hospital

Integrative Immunotherapy - Orthodox Medicines and Complementary Methods

The core characteristic of our clinical approach to cancer treatment is a combination of conventional medicine and Korean medicine. This integrative approach helps pain relief without adverse reactions.

Courses of Integrative Immunotherapy

Conventional Courses

Hyperthermia

The hyperthermia machine initially builds an electric field on the area where the tumor is located. As a high frequency wave from the machine affects the area, the temperature around the cancer cells increases. This wave destroys the cell membrane and causes an imbalance of the electrolyte. Consequently, the cancer cells are eliminated.

Jadaxin Infusion

Jadaxin is one of the orphan drugs of U.S. FDA and is known for its anticancer effect recovering and enhancing the immune system by attacking cancer cells directly without toxicity. This treatment can be more effective when combined with orthodox anticancer treatments such as a chemoradiation treatment

Selenium Therapy

Selenium is an anticancer substance of which antioxidant effect is 2,000 times stronger than vitamin E. This substance improves the immune system. Additionally, it also accelerates white blood cell production, controls blood clot production, prevents aging, and suppresses growth of cancer cells.

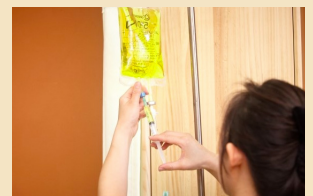

Mistletoe Therapy

Mistletoe is a type of the virginia creeper containing plenty amounts of anticancer substances. This is well known for its various effects: eliminating toxins in the body, strengthening metabolism, alleviating pain, and recovering functions of the immune system.

High-Dose vitamin C Therapy

Vitamin C is a representative antioxidant restraining carcinogen and facilitating anticarcinogen. It also inhibits cancer development, induces cancer cell death, relieves pain, strengthens immunity, and boosts metabolism.

Gerson therapy

Gerson therapy is the treatment infusing medicinal substance to the mucous membrane of colon through the anal. This therapy detoxifies the residues of the anticancer medicines and the painkillers in the body

Bio-Photon Therapy

Bio-Photon is the highly absorbent wave energy proceeded to the deep part of your body (40~50mm in depth). The fever generated by this process alleviates pain, boosts vital functions, enhance the immune system, and facilitates blood circulation.

Korean Medicine Courses

Fermented Herbal Medicine

Patients take the herbal medicine containing antioxidants and anticancer substances with the delicate refining process. Each ingredient has unique effects on cell restoration and detoxification. Especially, Wild Cultivated Ginseng can be used regardless of physical constitution.

Pharmacopuncture Therapy

The herbal medicines clinically effective on immune functions are injected to acupoints that reach blood vessel. These medicines work fast to strengthen the immune system and alleviate side effects caused by anticancer drugs

Mist Therapy

The medicine steamed out from a nebulizer passes through the respiratory organ. This method helps the medication work more effectively and improves the immune system without causing a discomfort.

Thermotherapy

This is a moxibustion treatment by using mugwort theoretically based on the Korean medicine background. This treatment elevates the temperature of the effect area in the body up to 40 Celsius degrees and the fever is spread to the whole body. Moreover, it facilitates white blood production, suppresses the growth of cancer cells, and relieves the pain.

Soshiol-R Therapy

Soshiol-R is a powder type oral medicine composed of the extracts of lacquer tree. It helps boost of immune cells, facilitation of blood production, and the control of the inflammatory pain caused by a tumor. It also works as an antioxidant.

Specialized Immunotherapy Courses

Herbal Food Therapy

We provide personalized and well-balanced herbal diets for patients.

Music Therapy

As music has a seven-note scale, it has something to do with the notion of the Eastern philosophy 'Chil-Jeong(七情)' which means all diseases and illnesses are caused by the seven types of the human emotion; pleasure, anger, worry, anxiety, sorrow, fear, and nervousness.

This therapy aims to improve a proper function of organs, relieve physical pains and psychological discomforts, and control symptoms.

Flower Therapy

Patients can feel relaxed and refreshed through this therapy while they see, smell and touch the fresh flowers, soils, and pebbles.

Smile Therapy

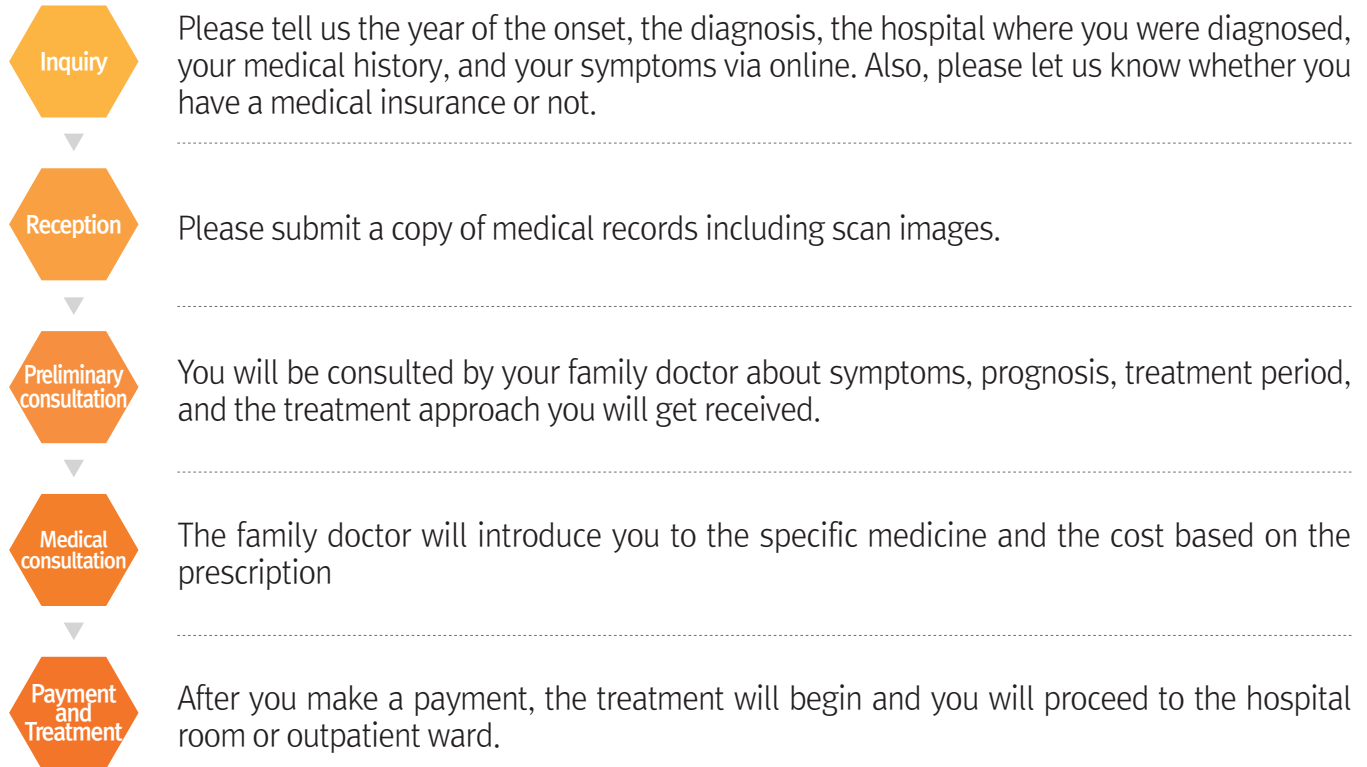

Patients can get refreshed and relieved feelings through this reviving program.

Counseling Program

This program is based on the holistic approach to human being as a human body and a mind influence each other. We provide patients with the counseling sessions conducted by the professional counselors so that the patients can reflect on their psychological experiences in the midst of struggles with cancer. Through the sessions, the patients' body and mind are in unison.
